

HASSAN SALEEM

AI & ML ENGINEER | DATA ENGINEER

ABOUT ME

I am passionate about crafting AI and Data Solutions that drive real business value. With a keen focus on developing scalable platforms and intelligent data processes, my work is centered on boosting efficiency, cutting costs, and fostering innovation. My commitment lies in translating advanced scientific knowledge and hands-on experience into commercially feasible solutions, contributing sustainably to corporate success.

WORK EXPERIENCE

Software Engineer - AI and Data Solutions

MAindtec GmbH | Ingolstadt | Jan 2025 - Sep 2025

- Spearheaded the development and launch of a **SaaS platform**, incorporating a RAG system, data pipelines, and validation layers.
- Enhanced **ETL pipelines** within Azure & GCP for efficient processing of extensive CAD and manufacturing data.
- Designed **AI-powered review pipelines** (LlamaIndex, Mistral) for automated detection of dimensional deviations and annotations, seamlessly integrated with CI/CD and MLOps.
- Developed **AI agents** for analyzing CAD geometries, manufacturing planning, and cost estimation, supported by robust MLOps workflows to ensure stable deployments.

Research Associate

Fraunhofer IPA | Stuttgart | Jul 2023 - Apr 2025

- Conducted advanced research on **CAPP systems and CAD data pipelines**, focusing on automated process planning.
- Benchmarked seven distinct systems and spearheaded the development of a comprehensive evaluation tool.
- Developed and trained **machine learning models** for CAD feature prediction, achieving approximately **80% accuracy**.

Junior ML- & Data Engineer / Python Developer

Cyberify | Multan | Jul 2021 - Apr 2023

- Engineered **SQL data pipelines** (MySQL) to process 10K+ daily transactions for customer analytics and ML-Ops support, achieving a ~30% reduction in deployment time.
- Trained **10+ ML models** for customers using TensorFlow, Keras, and PyTorch.
- Developed Python-based **data automation tools** for analysis, visualization, and reporting.

SKILLS

Python

SQL/NoSQL

Google Cloud Platform (BigQuery, Dataform, Vertex AI),

Docker, Kubernetes, MLflow

Machine Learning/ Deep Learning

Microsoft Azure (DataBricks, Synapse Analytics, Data Factory, Azure ML)

Apache Spark, Hadoop, Airflow, Kafka

LLMs , Generative AI

LANGUAGES

English

Deutsch

muhammadhassansaleem9@gmail.com

Ingolstadt, 85049, Deutschland

PERSONAL DETAILS

Date of birth

12/23/1999

Visa status

EU Blue Card

EDUCATION

Master's Degree

Technische Hochschule Deggendorf / Deggendorf / 2024

Artificial Intelligence for Smart Sensors and Actuators

Projects:

- TurtleBot Parking (LIDAR & ROS)
- Speech Command Recognition (PyTorch)
- Car Detection System

Bachelor of Science

Ghulam Ishaq Khan Institute of Science and Technology / Topi / 2021

Mechanical Engineering

Projekt:

Development of four wheel Steering mechanism
